VISION

Students entering school for the first time, including kindergarten and transfer students from out of state, will be required to provide proof of a vision evaluation taken within six months prior to the student's entrance.

The vision evaluation is required to test for amblyopia (lazy eye) and strabismus (misalignment of the eyes), which are two of the most common vision disorders in young children, as well as internal and external eye health and visual acuity. A certificate or form stating results of the evaluation must be signed by an optometrist, physician, physician assistant, or advanced practice registered nurse.
